Dear President Evans:

It is my pleasure to fax you the proof for my entry in *1000 Leaders of World Influence*. I am thankful for your support regarding my request for your second revision on my entry. Although I was given only one day for the proof, I am happy about the overall improvement.

I send my best wishes for your publication of the edition!

Sincerely,

Dear Senior Editor Jocelyn Timothy:

Thank you for Mrs. Inga Nunn's letter dated 2nd June 2000 (REF: CR/NSL/IN?FFHM/MISC) that includes the Director General's permission to make a copy of my own personal entry from the IBC's book, **The First Five Hundred at The New Millennium.**   Because of the IBC staff's great work on my entry, I will not only let my biographical essay in the book appear on my web site but also distribute the copy of it as many as possible.   The brief history of editorial works for my entry in the book is shown below.

1. The first draft for my entry in the book was faxed to the IBC at about 7 PM Korean Time on November 24, 1999.   Three photos (one for my portrait and two for Grand Canyon, USA) were express-mailed to you on 11/25/1999.
2. I was sent the first proof by the IBC, so the first revised biographical essay and marked corrections on the proof were faxed to you at about 11:30 PM Korean Time on 2/2/2000.
3. The second proof was sent to me by IBC, so the second revised biographical essay with marked corrections on the proof were faxed to you just before midnight on 5/24/2000.
4. Third revised essay and marked corrections on the third proof are being faxed to you now.

Thank you for all your and Ms. Helen Turnbull's early proof work for my entry in **The First Five Hundred at The New Millennium.**   Good luck on the publication of **The First Five Hundred at The New Millennium!**

Sincerely,

Dr. Dong-Keun Shin

Memo:

Dear Senior Editor Jocelyn Timothy:

I read the second and final proof for my entry in **The First Five Hundred at the New Millennium,** and marked corrections.   Faxing and e-mailing you both the marked proof and two-page revised one, I guess that my biographical essay is ready to be published.   Please make sure that three previously submitted photos are with you for my entry.   If not, please contact me immediately.   I have two requests as stated below:

1.   I want to have your written permission so that I can make copy of my entry for distributions. I will also let it appear in my web site and other electronic locations.
2.   I want to know the price of the book so that I may order more copies.

Please accept my sincere appreciation for all your and Ms. Helen Turnbull's proof work for my entry in **The First Five Hundred at the New Millennium.**

Good luck on the publication of **The First Five Hundred at the New Millennium!**

Sr. Research Scientist Yuriy A. Reznik
RealNetworks, Inc.
2601 Elliott Ave
Seattle, WA 98121
U.S.A.

Dear Mr. Reznik:

I read Wlodzimierz Dobosiewicz's paper, Gideon Ehrlich's paper, and others as you suggested. In their papers, both Dobosiewicz and Ehrlich proposed some sorting method. Their methods are different from my sorting and searching method, i.e., Shin sort. After receiving people's responses and investigating sorting methods, I am now confident that none had thought about Shin sort before I had.

I think that there may be discrepancies between what you said about their time complexities and what are actually stated in their papers. May I guess that you have been confused with the terms: 'time complexity' and 'expected time complexity'? Ehrlich needed to clarify terms in his paper as much as possible not to make people misunderstand the performance of his proposed algorithm. W. Dobosiewicz's method can be considered as a variation of quicksort as he stated in his paper. I am wondering if the discoverer of the quicksort, Professor C. A. R. Hoare, acknowledges Dobosiewicz's method to be valuable. Dobosiewicz somehow included a median finding process in his algorithm without providing a method for the process. The median finding process itself may require another sorting method.

You may disregard time complexity in uniform distribution case. Their ideas are, from the beginning, vulnerable in this regard. It's necessary for me to read papers and books that include sorting and searching methods, although I sometimes waste my time in reading futile attempts and invalid statements. I hope that you will soon have a chance to read papers about my sorting and searching method. Thank you and best wishes!

Sincerely,

Dr. Dong-Keun Shin

Rowland Martyn (War Displaced)
C/o Weekend Spark sub-office
7 Lamina Sankoh street
Freetown, Sierra Leone, W. Africa
20th January 2000 AD

Attn: Dr Dong-Keun Shin
Computer Scientist

Dear Dr. Dong-Keun,

Let me, first of all, on behalf of the displaced Management and staff of the WEEKEND SPARK Newspaper/Sierra Leone Wish you and your Company the best of successes this new year and Millennium. May all your great dreams be realised. Sorry to say the WEEKEND SPARK publication in Sierra Leone is in a pathetic situation. The newspaper which was the best selling Tabloid in Sierra Leone for many years and which started Modern Newspaper trend in the country in 1983 and has trained more than half of today's local print media practitioners has become a tragic victim of Sierra Leone's bloodiest 8½ years civil war. Its main two-storey office building at 49 Main Road, Wellington in Freetown was destroyed by Rebel fire with all its Litho and offset exposing machines, computers and Laser 5 printer, generator as well as other valuable printing assets and the country's only unique Well stocked newspaper/books library (now no more in existence). In addition, my own bona fide house in the city (38 Liverpool Street) was also burnt down by the Rebels during the January 6 1999 city invasion. As Managing Director I am today left with nothing to live a decent life and to continue the publication of the Weekend Spark. Eight (8) of my senior members of staff also had their dwelling houses burnt down during the same barbaric Rebel invasion of Freetown the capital. So far nothing is being said or done by the government to assist tragic business (newspaper) victims like us besides appealing to us to forgive and forget! The Sierra Leone Association of Journalists (SLAJ) is more or less more concerned principally with it's own individual financial interests than to fight for compensation for Newspapers which suffered in the war. WE ARE LEFT TO FEND FOR OURSELVES OR WE DIE OUT FOR EVER!! [P.T.O]

Dear Dr. Shin:

It was a special pleasure to hear from you this holiday season. Your friendship means so much to Landra and our family.

Though Nevada and our nation experienced great changes in 1999, the new millennium promises to bring with it even greater opportunities and gifts. We have been especially blessed with the gifts of new grandchildren from members of the Reid family.

We have much to be thankful for and with your continued friendship, Landra, myself and our entire family can look forward to a future full of promise and hope. From my family to yours, we wish you peace, happiness and joy in the coming year.

Sincerely,

HARRY REID
United States Senator

November 24, 1999

Director General Nicholas S. Law
International Biographical Centre
Cambridge CB2 3QP, England
United Kingdom

Dear Director General Law:

I am enclosing a rough draft of my essay and photos that may be shown in my two pages entry
in **The First Five Hundred at the New Millennium.**   I am faxing the rough draft of my
essay before mailing out this letter, so one of your editorial staff may start proofreading my
essay.   I appreciate Mrs. Inga Nunn's November 12th, 1999's email message that shows the
IBC's approval for my proposal.   She also informed me that the money for my dedication
entry in **2000 Outstanding Intellectuals of the 20th Century** will be partially transferred to
The First Five Hundred at the New Millennium.

I plan to send my letters to almost every country's ministry of education and announce that I
become a member of International Order of Merit as a representative of the world for services
to computer science.   I will also let you know when my letter is completed.

Good luck on your publication of **The First Five Hundred at the New Millennium!**

I look forward to receiving your proofreader's initial work for my essay.

Sincerely,

Dr. Dong-Keun Shin

Dear Dong,

It was nice talking to you over the phone just few moments ago.
While I would have to postpone looking for your fax until tomorrow (I gave you sever.
numbers, and I am not sure where all these fax machines are located:-), I would like
give you few references so that you can continue your investigation.

Two classic works on distributive partitioning leading to the O(1) search complexity
that I mentioned were:

1. W. Dobosiewicz "Sorting by Distributive Partitioning", Information Processing Let
   Volume 7, number 1, January 1978, pp. 1-6

2. G. Ehrlich "Searching and Sorting Real Numbers", Journal of Algorithms,
   number 2, 1981, pp. 1-12.

The first analysis of this type of sorting for a non-uniform distribution of input s.
and was given in:

3. M. Tamminen, "Analysis of N-trees", Information Processing Letters,
   Volume 16, number 3, April 1983, pp. 131-137

Another major result (namely, that the constant O(1) can be as low as two) was deriv.

4. M. Tamminen, "Two Levels Are as Good as Any", Journal of Algorithms,
   number 6, 1985, pp. 138-144.

In passing, I should mention that there have been a number other of works on the sub
(universal enumeration, hashing, Galois partitions, etc.) published in exUSSR that w.
definitely be of interest for you. Unfortunately, most of them have never been trans.
however, recently Kluwer has printed a book that, at least, briefly surveys some of
these results:

5. Rafail Krichevsky "Universal Compression and Retrieval", KAP, 1994
   ISBN 0-7923-2672-5

Please feel free to e-mail or call me if you would have more questions.

Yuriy.

Dear Ms. Helen Turnbull:

I am faxing you the proof with my marked corrections. The revised biography
will follow after the proof for you. Based on my yesterday's phone conversation
with Ms. Jocelyn Timothy, the IBC has received my photograph. I think everything
on my part is ready to be published in the edition.

My word processor gives a total of 999 words for the contents in my Dedication
Essay, so its size is about right. I started using my new name "Dong-Keun Shin"
in early 1997 from my old and official name "Dong Keun Shin". $_3$Thus, you may
understand why I use two different names for myself. I want S^{3}DBMS appears
correctly as shown in the revised biography. I also ask you not to write PhD
after my name because my doctoral degree initial is different. "Dr Dong-Keun Shin"
is good enough. The proof shows me that there are immediate line changes for
startings of new paragraphs. Clear paragraph changes make the essay more readable.
I also suggest you to put two spaces after each period for a sentence if possible.

Thank you very much for editing my Dedication Essay and best wishes from Seoul!

Warmest regards,

Dr. Dong-Keun Shin

Dean Paul R. Gray
College of Engineering
320 McLaughlin Hall
University of California, Berkeley
Berkeley, CA 94720
United States of America

Dear Dean Gray:

Greetings from Korea!   My zeal for Berkeley have not been hindered by the loss of job opportunity and will never be so.   You may want to hear about my business and engineering. I have not received any contract offer yet.   The current situation allows me to work slow and steady.   Because I will take a heavy responsibility in engineering a Shin Sort/Search DBMS, I have a tendency to spend more time in reviewing on OS these days.   However, I will be soon implementing a prototype software for my sorting/searching algorithm.

I am applying for Professorship at the University of Cambridge as shown in an advertisement in the July 1999 issue of the Communications of the ACM.   In my application, I needed to provide the names of two referees; I included your name in the list of my referees.   Please help me to get the Professorship at Cambridge.

I have not received any reply letter for the EECS Chair Randy Katz after I sent my letter to him last July asking for a challenge.   I hope anyone in the EECS department or CAL alumni to compete with me to be the greatest achiever in computer science.   It is wishful thinking to expect the department's radical change and theory-based reforms under the leadership of the greatest achiever in computer science.   Thank you for your time and best wishes from Seoul!

Sincerely,

Dr. Dong-Keun Shin

August 6, 1999

Professor and Chair Bhagirath Narahari
Department of Computer Science
The George Washington University
Washington, DC 20052
United States of America

Dear Chair Bhagirath Narahari:

I have recently heard about GW's new departments: Department of Computer Science and Department of Electrical and Computer Engineering. As a GW graduate who majored in computer science, I am happy about the news. I am enclosing a check of $300 to donate for the Department of Computer Science at the George Washington University. Although the donation is small, I hope it to be used well for the new CS Department.

In any community, to be better, there should be a leader. In 1997, I sent my letters to more than 4300 schools in the world, announcing that I have made the greatest contribution to computer science. In the letters, I asked for a challenge, but I have not received any serious challenge yet. I needed the mailing action in my process of gaining firm leadership in computer science. Moreover, I have discovered a new sorting algorithm, which is the best one. I want to let every faculty, staff, alumni, and students know about my '97 proclamation of having made the greatest achievement in computer science. Please support anyone in the department to send me a letter with a serious challenge to my proclamation by the end of the year 1999. If none, I will assume that your department is under my leadership thereafter. I believe the reputation of GW's CS will be improved because of my name, Shin.

Thank you for your time and best wishes from Seoul!

Sincerely,

Dr. Dong-Keun Shin

Dean Thomas A. Mazzuchi
School of Engineering and Applied Science
The George Washington University
Washington, DC 20052
United States of America

Dear Dean Mazzuchi:

I have recently heard about GWU's new departments: Department of Electrical and Computer Engineering and Department of Computer Science.   As an alumnus who majored in computer science at GW, I am happy about the news.

I am applying for Professorship at the University of Cambridge as advertised in the July 1999 issue of the Communications of the ACM.   In my application, I needed to provide the names of two referees.   I included your name in the list of my referees.   You may ask Professor Arnold C. Meltzer, my dissertation advisor, Professor Simon Y. Berkovich, Professor Ward Douglas Maurer, and Professor Michael Feldman about me and my work to be the referee. The Professors were in my dissertation committee.

I am enclosing my letter to the chair of the department of computer science, so you may read it and show it to faculty and staff at the GWU.   It is my wishful thinking to expect radical change under the leadership of the greatest achiever in computer science.   Thank you for your time and best wishes from Seoul!

Sincerely,

Dr. Dong-Keun Shin

Dear Director General Law:

Thank you for the several letters that I have recently received from IBC.   Please excuse me if I have not responded promptly.   I am enclosing my biography and my photo which may appear in the Dedication Section of the Outstanding People of the 20th Century as well as filled acceptance form.   I will also fax the form and the biography to you before my mailing to make sure that I reply within three weeks of receipt.

I have received your letter regarding your nominating me for Deputy Director General and Fellow for the IBC.   I am very thankful for such highest honor from the IBC.   Please allow me to consider the position several years later.

I am enclosing my recent letters to Afghanistan's major newspapers for my press release in April 1999 as a sample of about 1200 letters of mine to the world's press.   I hope that my biography in the special Dedication Section will also inspire the rest of computer scientists to greater efforts.   Good luck on your publication of the Outstanding People of the 20th Century and best wishes from Seoul!

Sincerely,

Dr. Dong-Keun Shin

Dear Senior Editor White:

Thank you for your editorial work for my entry in the *Five Hundred Leaders of Influence-Eighth Edition*.   I am returning my printed proof via fax to make sure that the ABI receives it before the indicated date.   You may realize that there are still a few corrections to be made for my entry.   I am sure that you will do a fine editorial job on my biography.   I will also mail the faxed ones to you soon.   Good luck on your publication of the *Five Hundred Leaders of Influence*-Eighth Edition and best wishes from Seoul!

Sincerely,

Dr. Dong-Keun Shin

President
Office of the President
Computer Based Systems, Inc
2750 Prosperity Avenue
Fairfax, Virginia 22031-4312
United States of America

Dear President:

It is my pleasure to announce that I discovered a new sorting algorithm on July 3, 1998 and that mine is the best sorting algorithm. I am informing Computer Based Systems, Inc of an upcoming prototype of my sorting and searching software during this advertising campaign.

As the Dean of College of Engineering at UC Berkeley, Paul R. Gray, said to me that literal sorting, i.e., Shin sort and radix sort, will prevail, Shin sort, named after my last name, will be used in most large scale computer-based systems. While Shin sort has $O(N)$ and $O(1)$ time complexities for sorting and searching respectively, radix sort is slow in searching and poor in parallel processing. Replacing sorting algorithms, hashing schemes and hash tables, and B-trees and most trees, the efficient sorting and searching scheme that traverses in Shin's tree will play a central role in managing data. My software will enhance your computer-based system.

My profile may be included in several publications such as *Outstanding People of the 20th Century* by International Biographical Centre in Cambridge, England, *Five Hundred Leaders of Influence, 8th Edition* by American Biographical Institute in Raleigh, NC, USA, and *International WHO'S WHO* by Gibralter Publishing in Jacksonville, NC, USA. I am enclosing my profile that appears in *1998 International WHO'S WHO of Professionals* for your cross-examination. The profile will also help you to check my eligibility for such project. If my sorting algorithm does not have a theoretical advantage that provides a practical certainty, I will refund your money. If you fill in the enclosed contact request form and return it, I will contact an appointee.

I look forward to hearing from you. Thank you for your time and best wishes for your commercial success at Computer Based Systems, Inc!

Sincerely,

Dr. Dong-Keun Shin
