President Barack Obama
Office of the President
The White House
1600 Pennsylvania Avenue NW
Washington, DC 20500
United States of America

Dear President Barack Obama:

I am not sure that you remember me since I know you are very busy. Thus, I decided to introduce myself to you again through the enclosed profile that appears in the book, *The First Five Hundred at the New Millennium*, which was published by the International Biographical Centre, Cambridge, England, in 2000.

I believe that my sorting method, Shin sort, will be used in every computer system that handles huge amounts of searched data. Because of my discovery of this best sorting method, my achievements in computer science have been unrivaled for more than a decade. I have been looking for a company with an established reputation to partner with. The company will buy my Shin sort software and distribute it for database systems all over the world. I foresee this partner company and myself making great contributions to the world.

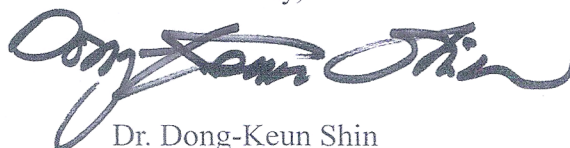

Here are two copies of my article that was printed in Korea's *Patentnews* magazine last May. I hope that you will pass them on to your colleagues as well. Feel free to request additional copies if you need more.

The video, "Show How Shin Sort Works.", which is located at http://www.dkshin.com/HTML/Video_Lectures_Menu.htm, will help you to understand my sorting idea further. While watching the 20-minute video, even a layman can understand how my sorting method sorts data. I am sure that you will find my video informative.

My letter gives you an opportunity to consider Shin sort before I have signed a contract with a computer technology firm and give them exclusive distribution of Shin sort in the USA and the world. Instead, that company could be yours or one you know. If I can provide further details, please let me know. Thank you for your time and consideration of my sorting method.

God bless the USA.

Sincerely,

Dr. Dong-Keun Shin
